Commonwealth Care Alliance® (CCA) is a health plan that contracts with both Medicare and MassHealth to provide benefits of both programs to enrollees (Medicare-Medicaid Plan). Enrollment in the Plan depends on contract renewal to provide benefits for both programs to enrollees. Enrollment is voluntary. This information is not a complete description of benefits. Limitations, copayments, and restrictions may apply. For more information, call CCA Member Services at 866-610-2273 (TTY 711), or read the Plan Member Handbook for a complete list. Benefits may change January 1 of each year. CCA complies with applicable Federal civil rights laws and does not discriminate based on race, ethnicity, national origin, religion, gender, gender identity, sex, age, mental or physical disability, health status, claims experience, medical history, genetic information, evidence of insurability or geographic location. This Plan is available to people who live in the plan’s service area, are aged 21 to 64, have Medicare A and B, and are eligible for Part D and either MassHealth Standard or MassHealth CommonHealth.

Commonwealth Care Alliance® knows that, as a woman, you need special care to help you live a healthy and independent life.

One of the best ways to stay healthy is through preventive care, which includes tests to help prevent diseases or find them early enough to make treatment easier.

Our records indicate you may need screening for one or both of these diseases:

- Breast Cancer
- Cervical Cancer

To learn more about these diseases, please read the information on the inside of this brochure.

Call your doctor or practitioner today to schedule your tests.
Breast Cancer
Breast cancer is the most common type of cancer in American women. Being a woman and getting older are the main risk factors.

Most women do not have early signs of breast cancer, which is why screening is so important.

What is the screening?
Screening is through mammogram (an X-ray picture of the breast).

- Mammograms are recommended every two years for women 50 to 74.
- Women ages 40 to 49 who may have a higher risk of breast cancer should ask their healthcare provider about a mammogram.

Call your doctor to schedule an appointment. For help scheduling an appointment or arranging transportation, please call CCA Member Services at 1-866-610-2273 (TTY: 711) 8 a.m. to 8 p.m., 7 days a week.

Cervical Cancer
Any woman may be at risk of cervical cancer, which is why it’s important to be tested.

What is the screening?
A Pap test looks for cell changes that could turn to cancer if left untreated.
The HPV test looks for the virus that causes cell changes.

- Women ages 21 to 29 should receive a Pap test every 3 years.
- Women ages 30 to 65 should receive a Pap test and HPV test every 5 years.

How can I schedule one or both of these tests?
Call your doctor to schedule an appointment. For help scheduling an appointment or arranging transportation, please call CCA Member Services at 1-866-610-2273 (TTY: 711).
If you do not have a GYN provider, CCA offers women’s health screenings at our Commonwealth Community Care (CCC) locations in Boston, Lawrence and Springfield.
