OVERVIEW:

This Commonwealth Care Alliance (CCA) Medical Benefit Medicare Part B Step Therapy Medical Necessity Guideline (MNG) is for informational purposes only and does not constitute or replace medical advice. Physicians, hospitals, and other providers are expected to care for their patients in such a way that they can use or administer drugs/biologicals in the most effective and clinically appropriate manner. Physicians and health care providers are solely responsible for making any decisions about medical care.

Each benefit plan contains its own provisions for coverage, limitations and exclusions as stated in the member’s Evidence of Coverage (EOC). If there is a discrepancy between this policy and the member’s EOC, the member’s EOC provision(s) will govern.

Each class of medical benefit drugs covered under Medicare Part B referenced below includes preferred drugs(s)/product(s). Step therapy prior authorization for a non-preferred drug/product will generally require history of use of a preferred drug/product within the same medical benefit injectable class along with additional criteria.

The medical benefit injectables that include non- preferred drug(s)/product(s) are subject to prior authorization, and preferred drug(s)/product(s), can be found below.

Experimental and investigational procedures, items, and medications are not covered by CCA as outlined in Experimental and Investigational Drug Medical Necessity Guidelines.

Medicare Part B Step Therapy Medical Necessity Guideline

DECISION GUIDELINES:

DESCRIPTION OF SERVICES:

Specific classes of medical benefit drugs covered under Medicare Part B will include non-preferred therapies that require prior authorization. Prior authorization for a non-preferred therapy will generally require a history of use of a preferred therapy within the same medical benefit injectable class, among other criteria.

MEDICAL THERAPEUTIC DRUG CLASSES

There are specific classes of medical benefit drugs covered under Medicare Part B that will include preferred and non-preferred drugs or products. The drugs or products may be biosimilars or products with multiple manufacturers. There are an increasing number of FDA approved biosimilar drugs/products available in marketplace. A biosimilar is a biological product approved based on data demonstrating that it is similar to FDA- approved biological product, known as the reference product, and that there are no clinically significant differences between the biosimilar product and the reference product. Biosimilars produce equivalent therapeutic results and are lower cost than brand name alternatives. This policy only applies to biological agents being used for FDA approved indications. In instances where the preferred drug is unavailable, the non-preferred drug(s) may be requested and approved by CCA. Availability is defined by CCA as a regional or nationwide shortage of a drug that is not specific to a single distributor or provider.

Clinical Coverage Criteria:

CCA may authorize coverage for a non-preferred product when documentation of **one (1) of the following:**

- **Note:** If a provider administers a non-preferred product without obtaining prior authorization, CCA may deny claims for the non-preferred product.
- a. History of use of at least one preferred product resulting in a substandard response to therapy **OR**
- b. History of intolerance or adverse event to at least one preferred product **OR**
- c. Rationale by the treating provider that the preferred product(s) is not clinically appropriate **OR**
 - **Note:** Convenience does not qualify as a rationale for clinical inappropriateness of a preferred product
- d. Continuation of prior treatment with the requested non-preferred product within the past 365 days **OR**
 - **Note:** For the purposes of this policy, a current drug/product means the member has a paid claim or clear clinical documentation (not including drug samples) for the drug/product within the past 365 days (claims look-back period).

Medicare Part B Step Therapy Medical Necessity Guideline

When applicable, a list(s) of codes requiring prior authorization is provided. This list is for reference purposes only and may not be all inclusive. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment.

Therapeutic Class	Preferred Drug		HCPC	Non-Preferred Drug		HCPC
Antineoplastic Monoclonal Antibodies Targeting CD20 Rituximab	Truxima	Rituximab-abbs	Q5115	Rituxan	Rituximab	J9312
	Ruxience	Rituximab-pvvr	Q5119	Riabni	Rituximab	Q5123

REGULATORY NOTES:

Medicare Part B Step Therapy Medical Necessity Guideline

Medical Necessity Guidelines are published to provide a better understanding of the basis upon which coverage decisions are made. CCA makes coverage decisions on a case-by-case basis by considering the individual member's health care needs. If at any time an applicable CMS LCD or NCD or state-specific MNG is more expansive than the criteria set forth herein, the NCD, LCD, or state-specific MNG criteria shall supersede these criteria. This MNG references the specific regulations, coverage, limitations, service conditions, and/or prior authorization requirements in the following:

REVISION LOG:

REVISION DATE	DESCRIPTION
1/9/25	Updated to align with CVS preferred drug list.
12/31/23	Utilization Management Committee approval
12/4/23	Coding correction J0178

Medicare Part B Step Therapy Medical Necessity Guideline

09/09/2023	<p>Added Vegzelma, Q5129, bevacizumab-adcd, as non-preferred to Vascular Endothelial Growth Factor (VEGF) Inhibitors</p> <p>Added Fylnetra, Q5130, pegfilgrastim-pbbk, as non-preferred to Colony Stimulating Factors (long acting)</p> <p>Added Stimufend, Q5127, pegfilgrastim-fpgk, as non-preferred to Colony Stimulating Factors (long acting)</p> <p>Added Retinal disorder drug class, preferred and non-preferred drugs.</p>
9/12/2022	<p>Alymsys added to policy (new biosimilar)</p> <p>HCPCS code J7321 has been updated to include</p> <p>Visco-3 Releuko added to policy (new biosimilar)</p> <p>HCPCS code Neulasta has been updated to J2506</p> <p>Fulphila changed from preferred to non-preferred.</p> <p>Udenyca changed from non-preferred to preferred</p>
6/2/2022	Template update
9/23/2021	<p>Nyvepria and Riabni added to policy (new biosimilars)</p> <p>Changed Inflectra from preferred to non-preferred.</p> <p>Changed Ziextenzo and Ruxience from non-preferred to preferred</p> <p>Added epoetin alfa (Epogen/Procrit) and Retacrit to policy</p>
12/27/2021	Added language related to drug shortages

Disclaimer

Commonwealth Care Alliance (CCA) follows applicable Medicare and Medicaid regulations and uses evidence based InterQual® criteria, when available, to review prior authorization requests for medical necessity. This Medical Necessity Guideline (MNG) applies to all CCA Products unless a more expansive and applicable CMS National Coverage Determinations (NCDs), Local Coverage Determinations (LCDs), or state-specific medical necessity guideline exists. Medical Necessity Guidelines are published to provide a better understanding of the basis upon which coverage decisions are made. CCA makes coverage decisions on a case-by-case basis by considering the individual member's health care needs. If at any time an applicable CMS LCD or NCD or state-specific MNG is more expansive than the criteria set forth herein, the NCD, LCD, or state-specific MNG criteria shall supersede these criteria.

Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. This Medical Necessity Guideline is subject to all applicable Plan Policies and Guidelines, including requirements for prior authorization and other requirements in Provider's agreement with the Plan (including complying with Plan's Provider Manual specifications).

This Medical Necessity Guideline is not a rigid rule. As with all CCA's criteria, the fact that a member does not meet these criteria does not, in and of itself, indicate that no coverage can be issued for these services. Providers are advised, however, that if they request services for any member who they know does not meet our criteria, the request should be accompanied by clear and convincing documentation of medical necessity. The preferred type of documentation is the letter of medical necessity, indicating that a request should be covered either because there is supporting science indicating medical necessity [supporting literature (full text preferred) should be attached to the request], or describing the member's unique clinical circumstances, and describing why this service or supply will be more effective and/or less costly

Medicare Part B Step Therapy Medical Necessity Guideline

than another service which would otherwise be covered. Note that both supporting scientific evidence and a description of the member's unique clinical circumstances will generally be required.
