OVERVIEW:

A hearing aid is a small electronic device consisting of a microphone, amplifier and a receiver that is worn in or behind the ear. It increases the loudness of sounds and speech for a hearing-impaired person.

DECISION GUIDELINES:

Clinical Eligibility:

Hearing aids are a covered benefit if the member has a hearing loss that is between mild and profound severity.

Determination of need:

(All criteria must be met if applicable) Initial purchase of a hearing aid would require criteria 1, 2 and 3 to be approved. Replacement hearing aid would require criteria 1-5 to be approved.

1. Audiological evaluation completed with the following details:
 - A. Severity of hearing loss identified as mild (25-40 dB HL), moderate (41-70 dB HL), severe (71-90 dB HL), or profound (less than or equal to 91 dB HL)
 - B. Type of hearing loss identified as conductive, sensorineural, or mixed
 - C. Hearing loss in one ear (unilateral) interferes with communication or hearing loss in both ears (bilateral) interferes with communication
 - D. Hearing aid fitted and dispensed by audiologist or hearing aid specialist
2. Medical Clearance Form signed by MD that indicates that the member is a candidate for and has no medical conditions that would contra-indicate the use of a hearing aid.
3. Itemized estimate of the anticipated cost of the hearing aid must be provided.
4. Copy of original audiological evaluation is required if the replacement hearing aid is needed because of a medical change.
5. If replacement a statement of the circumstances of the loss or destruction of the hearing aid (where applicable)

Medical Necessity Guideline

LIMITATIONS/EXCLUSIONS:

- Manufacturer’s warranty must be checked prior to repair or replacement of hearing aid.
- Clinical documentation needs to have been dated and signed within 6 months of the dispensing date of hearing aid (i.e., Audiological Evaluation and Medical Clearance Form).
- Member currently has a working hearing aid.
- MD finds a medical contra-indication for the use of a hearing aid.
- Member not willing to utilize hearing aid device.

KEY CARE PLANNING CONSIDERATIONS:

- Member has both the mental and physical capabilities to safely use the device or has a caregiver to assist them with the device.

AUTHORIZATION:

PA required if line item is >\$500.00

This MNG guide is not a rigid rule. CCA has the mission to address all of our complicated members’ health needs. Care partners can identify members with Behavioral Health and HOPE (*) challenges who may benefit from extending these guidelines to support our at-risk members’ unique health challenges. CCA encourages our clinicians to clearly document our members’ unique health contexts when requesting care which does not meet this formal DST’s conditions and recommendations.

*High Opiate Patient Engagement = members with high doses of opiates whom we hope to help by treating their pain alternatively and reducing their exposure to dangerous opiates.
